

Do you want to exercise your anatomy knowledge over the summer break?

Does dissection appeal to you?

If so, a summer dissection scholarship may be of interest!

Each Dec-Feb the School of Biomedical Sciences offers 20x \$2000 scholarships to students to undertake 100hrs of dissection over summer.

In addition to providing hands on anatomy experience, a chance to improve and implement anatomical knowledge, and an opportunity for students to improve their technical skills, this experience allows students to discover their practical talent for dissection.

The application process is competitive. At the time of application, candidates must be enrolled UQ students having undertaken at least one anatomy class as prior coursework.

Offers are based on prior achievement in the student's last anatomy course undertaken, mastery of anatomy practice as evidenced by notable past anatomical achievements, and written justification for the award / ethical statement at the time of application (see application form for details). Past RACS Dissection Award winners and paid SBMS prosectors are not eligible to apply.

Dissection projects, pre-determined by the GAF Manager(s), will be assigned to successful applicants.

Dissections should be of high quality. Those deemed suitable will subsequently enter the prosection collection for teaching.

Successful applicants must commit to completing at least 100hrs of dissection across 8 weeks (no more than 5 hrs per day), between 12 Dec 22 – 17 Feb 23.

NB. Scholarship funding is not paid during absences from the University, such as over the Christmas break. Do not apply if you cannot commit to the 100 hrs of dissection. This includes if your medical rotations interfere with your completion of 100 hrs.

At the completion of the dissection project, commendations may be awarded to scholarship holders depending on the quality of the work achieved. High commendations will be eligible for one of three **Royal Australasian College of Surgeons Awards for Best Dissection.**

Applications open: Now
Applications close: 2-Dec-22

NB. Applications submitted outside the stipulated submissions window will not be considered.

Successful candidates notified by:
5-Dec-22

Application forms are available from the GAF website: <https://biomedical-sciences.uq.edu.au/facilities/gross-anatomy-facility/>
